

DOUBLE COATED TAPE

PROGRAM OVERVIEW

This **D-I-Y Trial Pack** is designed to give you the opportunity to try a range of possible solutions to some of the more basic pressure-sensitive tape applications, quickly and easily. Enclosed are 6 full-length rolls of tape. Each roll has a label in the core containing product identification information. We have listed below some of the significant characteristics for each product to help you determine why one product may be more suitable for your particular application. On the back of this page you will find some helpful suggestions on using this **D-I-Y Trial Pack** to find the best tape for your applications.

PRODUCT DESCRIPTIONS AND SPECIFICATIONS

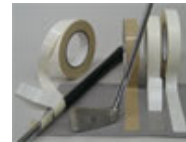

421512
Double Coated Film Tape

Sample Size: 24mm x 55m (1" x 60 Yards)
Std Sizes: Custom slit to any Imperial or Metric size width less than 54". Available only in 60 yard length.
Manufacturer: SpecTape
Colors: Translucent
Description: Rubber adhesive coated onto a thin polyester carrier that provides a quick, aggressive bond upon application.

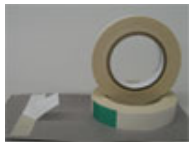

ST 243E
Double Coated Film Tape

Sample Size: 24mm x 33m (1" x 36 Yards)
Std Sizes: Custom slit to any Imperial or Metric size width less than 54". Available only in 36 yard length.
Manufacturer: SpecTape
Colors: Translucent
Description: Rubber adhesive coated onto a conformable PE film carrier that is well suited for use on uneven surfaces.

ST 550E
Double Coated Paper Tape

Sample Size: 24mm x 33m (1" x 36 Yards)
Std Sizes: Custom slit to any Imperial or Metric size width less than 54". Available only in 36 yard length.
Manufacturer: SpecTape
Colors: Crepe
Description: Rubber adhesive coated onto a paper carrier that is sometimes referred to as Double Stick Masking or Golf Grip Tape.

421524
Double Coated Tissue Tape

Sample Size: 24mm x 55m (1" x 60 Yards)
Std Sizes: Custom slit to any Imperial or Metric size width less than 54". Available only in 60 yard length.
Manufacturer: SpecTape
Colors: Translucent
Description: Acrylic adhesive coated tissue with excellent performance in low and high temperatures.

ST 597E
Double Coated Film Tape

Sample Size: 24mm x 55m (1" x 60 Yards)
Std Sizes: Custom slit to any Imperial or Metric size width less than 54". Available only in 72 yard length.
Manufacturer: SpecTape
Colors: Translucent
Description: Rubber adhesive coated onto a thin polyester carrier that provides a quick, aggressive bond upon application.

421514
Double Coated Film Tape

Sample Size: 24mm x 66m (1" x 60 Yards)
Std Sizes: Custom slit to any Imperial or Metric size width less than 54". Available only in 60 yard length.
Manufacturer: SpecTape
Colors: Translucent
Description: Acrylic adhesive coated onto a thin polyester carrier that provides good initial adhesion, high tack, and high shear strength.

Double Coated Tape Trial Pack Cost: \$29.99

The full cost of this **D-I-Y Trial Pack** will be applied to the purchase of a full carton of any tape product. We accept Visa, Mastercard & American Express

DOUBLE COATED TAPE

PROGRAM INSTRUCTIONS

1. Inspect the rolls and make sure that the product information on the tape core labels matches the products described on the opposite side of this page. If you did not receive the correct tapes, please contact our customer service department immediately for a no-charge replacement.
2. Review the product descriptions and specifications for the tapes and identify the performance characteristics that appear to be the best fit for your particular application.
3. When you have selected the first product for testing, apply the tape using methods and procedures that are as close to your actual production environment as possible. Try at least three of the enclosed products without exhausting all of the tape on any of the individual rolls. This will enable you to judge a range of tape performance and provide you with leftover yardage for use in additional test environments, if necessary.
4. Once you have selected the tape that works best, contact us for a competitive price quote by phone, email or using the "Request a Quote" page on our website. When you identify yourself as a **D-I-Y Trial Pack** customer, you will be eligible to receive credit for the full cost of the **D-I-Y Trial Pack** toward your first purchase of tape.
5. The tapes included in this **D-I-Y Trial Pack** are the most popular out of dozens of the tapes available in this category. If your tests reveal that none of the enclosed tapes work satisfactorily in your operation, we have experienced application specialists who can help you find the best solution. Call our toll free number and a customer service representative will help you get the answers you need.

DOUBLE COATED TAPE - NOTES

COMPARATIVE DATA:	421512	ST 243E	ST 550E	421524	ST 597E	421514
Tensil Strength	n/a	n/a	16	8	10	8
Adhesion Level	96	90	86	48	120	83
Thickness (Mils)	3.5	7.1	6	3.3	3	3.2

1. Double coated tapes are useful for a wide range of bonding, mounting and splicing applications on film, paper, foil, metal, glass and plastic surfaces. These surfaces must be clean, dry and free of oils or cleaning solution residues.
2. The ultimate strength of an adhesive bond is determined by application pressure, time and temperature. Acrylic adhesives require at least 24 hours to achieve their ultimate bonding strength. Rubber adhesives provide immediate bonding strength that does increase significantly over time.

With nearly six decades of service in the industry, the Englewood Company is a major supplier and converter of pressure-sensitive tapes, labels and packaging systems. We have a team of professionals who can evaluate the specific requirements of any application and recommend the appropriate solution at a competitive price.
